PROFESSIONAL EXPERIENCE

Paxform Pty Ltd | Level 2, 11 York St, Sydney, NSW 2000, Australia (Remote) | May, 2025 to August, 2026.

Software Quality Assurance Tester

- Developed, documented, and executed comprehensive test plans and test cases for new features and bug fixes.
- Performed functional, regression, usability, compatibility, and performance testing on web and mobile app.
- Identified, recorded, and tracked bugs using issue-tracking tools (Active Kolllab)
- Collaborated with developers to resolve defects and verify fixes.
- Ensured test coverage aligns with business requirements and user expectations.
- Conducted cross-browser and cross-device testing to maintain consistent form experiences.
- Validated integrations with third-party services (e.g., payments, authentication, data export).
- Provided detailed test reports and sign-off for releases.

GKpele Ltd | 32 Bennett House Page Street, London, United Kingdom (Remote) | January, 2025 to July, 2025

Software Quality Assurance Tester

- Developed detailed test cases in TestRail, and test execution sequence, while conducting layout testing, functional, UAT, mobile testing on a school management product.
- Meticulously analyzed requirements, functional specs and effectively designed test cases to ensure extensive coverage, while using Jira and Mantis to log and track bugs/defects.
- Actively engaged in various testing activities, including test case creation, and test execution, while ensuring cross-platform reliability through comprehensive testing on multiple browsers and operating system combinations.
- Collaborated with QA professionals, program designers, and developers in an agile team to achieve project deliverables within a defined timeline.
- Contributed to the early detection and resolution of defects, which ultimately enhanced software stability and reliability.

Moremonee Microfinance Bank | Lagos, Nigeria (Remote) | July, 2023 to November, 2024

Software Quality Assurance Tester

- Collaborate with product owners, business analysts, and developers to understand functional and non-functional requirement of the software.
- Create detailed test plans and test cases.
- Execute all test cases as regards all functionalities, integrations, performance and security tests.
- Participated in identifying potential areas for improvement within the testing process.

Emoprium Limited| Volunteer | Lagos (Remote) | October, 2022 to August, 2023

Software Quality Assurance Tester

- Reviewed product documentations on ClickUp and suggested areas for improvement.
- Reviewed product designs and compared against product documents.
- Developed test cases and executed tests.
- Carried out early bug detection and resolution.
- Carried out regression testing after each upgrade to ensure that modifications to the software have not introduced unintended side effects or defects.
